

Beyond The Guide Deepdive Pharma & Life Sciences Supply Chain

Sustainable procurement is a journey - one that no company can navigate alone. In the spirit of collaboration and shared learning, the [SPP Pharma & Life Sciences Chapter](#) launched a supplier engagement initiative to uncover and share real-world insights from across the pharmaceutical and life sciences supply chain.

This effort, led by SPP Champions Pfizer and AstraZeneca, was inspired by [The Guide](#), an initiative by the Sustainable Procurement Pledge (SPP) [Champion Program](#) in 2023 that aims to inspire & empower procurement professionals committed to driving sustainability, sharing ugly truths, best practices, and case studies across a range of industries and sustainability topics.

The response to the supplier engagement effort was incredible - more than 70 suppliers contributed case studies, providing a wealth of knowledge on what works (and what doesn't) when integrating sustainability into procurement & supply chain strategies.

From these submissions, 53 case studies have been carefully selected for the *Beyond The Guide Deepdive: Pharma & Life Sciences Supply Chain* - a practical resource that will share a collection of experiences, challenges, and solutions designed to inform, inspire, and accelerate sustainable procurement efforts.

We invite you to explore this list, and we look forward to sharing the full *Beyond The Guide Deepdive* soon!
